

The Tree Gees are one of the most important Bee Gees tribute in the world.

The band was formed by musicians of Gianni Morandi in the winter of 1997 and since then they had an intense activity with live events (they have just reach the 500th concert), television appearances and radio, offering a unique show, as an original proposal of a great live experience, and above all an extraordinary repertoire with rigor and stylistic perfection and with lightness and irony

The Tree Gees have recently had great success in Europe, with the production of a show that made sold out in the theaters of major German cities.

The concert schedule includes an hour and 45 min. of great success, culminating with the grand finale entirely dedicated to the Saturday Night fever: Stayin'alive, Night Fever, You Should Be Dancing etc. ..
